After pitching to several companies, we felt that Amsterdam Standard had the best understanding of our needs and wants to the development of our dashboard. The first meetings were great moments for us to gain insights from a different perspective and incorporate uses we never thought about till that point. In the overall process, it was and still is the great working experience with everybody at Amsterdam Standard. We would definitely recommend Amsterdam Standard towards companies looking for strong development solutions.

I've worked with Amsterdam Standard for 8 years now and it has been a great journey so far. We were able to grow faster together. Without my team in Krakow, MrWork wouldn't have the success it has today. The developers at Amsterdam Standard took the development of our software platform to the next level. They are a great team that delivers amazing quality!
